

# EQUESTRIAN

Omega-enriched, low starch,  
semi-concentrate, Hemp Superfibre

20kg

## WHY DO WE USE HEMP AS A KEY INGREDIENT IN OUR FEED?

Hemp is the ideal, complete protein alternative to traditional stockfeed sources. Hemp seeds are a great source of high-quality protein that rival soybean's amino acid profile and Omega-3 fatty acid content. Hemp seeds have approximately three times more Omega-6 than Omega-3 fatty acids, giving them a 3:1 ratio.

Hemp meal (derived from the cold pressing process for creating hemp oil) adds an ideal source of Omega fatty acids, protein and fibre. Hemp also provides an Omega-6 fatty acid called gamma linolenic acid (GLA). Research shows that GLA is somewhat unique among Omega-6 fatty acids, in that unlike most other Omega fats, it supports anti-inflammatory processes in animals.

**EquiHemp™** meal and oil is produced from Australian industrial hemp (*Cannabis sativa*), and contains micro to zero quantities of THC (cannabinoids). Hemp crops are similar to other traditional grain in that the tops are harvested for the seed, and the remaining plant material is harvested for other uses including fibre. Hemp seeds contain no THC.

## THE BENEFITS OF LOW STARCH FEEDS FOR HORSES:

Horses derive dietary energy from a multitude of sources. A combination of fibre, starch, and fat is generally the best way to fuel performance, whether it is for breeding stock, on the trail, or in the show arena. Providing your horse with a high-fibre, low-starch feed can assist to help regulate blood glucose levels which in turn will help to curb excitability, insulin resistance or sensitivity, obesity, and muscle disorders or stiffness.

### INGREDIENTS:

Green Valley Naturals balancer pellet (**EquiHemp™**), pea pollard, canola meal, lupin meal, ground almond hulls, hemp seed hulls, cereal by-products, steam rolled lupins, steam rolled barley, beet pulp flakes, sunflower seeds, monocalcium phosphate, calcium carbonate, GVN High Performance Vitamin and Mineral Premix, Molafoss Gold oil, salt, natural vitamin E and biotin.

Pure Vitality contains added **Pro(N8)ure IFS™** "In feed Solution" combining three essential elements; a Dual-Strain Probiotic, a Prebiotic and a Multi-Strain enzyme to form a natural microflora management tool for improved digestion resulting in better performance and good health.
